 **Magnitude of the 3/11 disaster** 
Office of Science and Innovation

As of May 5, from government

- Number of people killed: 14871
- Number of people missing: 10171
- Totally collapsed buildings: 78641
- Evacuated: +165 000 persons
- Reconstruction cost 1200 – 1900 billion SEK

 **Example: J-Parc** 
(Japan Proton Accelerator Research Complex,
Tokai Village, 100 km north Tokyo)
Office of Science and Innovation

Main Control Room

Main Control Room was in a reasonable shape.

Road in front of Linac

Serious cracks on the road. This is a typical one and can be seen all over the J-PARC area.

growth analysis **Restoration..**

EMBASSY OF SWEDEN
Tokyo
Office of Science and Innovation

Manufacturing Industry

1. Present status and prospects of restoration of production bases in the affected areas

- More than 60% of affected bases of respondents have already finished restoration.
- Meanwhile, other production bases are on the way to resumption, and about less than 30% are expected to be restored by summer.

(Reference) The ratio of the number of establishments located in the municipalities in 7 prefectures (Aomori, Iwate, Miyagi, Fukushima, Ibaraki, Tochigi, and Chiba) covered by the Disaster Relief Act in the total number of the manufacturing establishments all over the country, is about 7%. (The figure was calculated based on Census of Manufactures 2008, as of March 27)

Present status and prospects of production bases in the affected areas

Restoration Status	Whole manufacturing (70)	Material Industry (46)	Processing Industry (24)
Finished restoration	64%	67%	58%
Within 1 month	11%	9%	17%
1 month later	4%	7%	13%
2 months later	7%	9%	9%
3 months later	3%	2%	4%
By summer (1-3 months later)	26%	20%	38%
4-6 months later	3%	4%	0%
6 months - 1 year	0%	0%	0%
More than a year	0%	0%	0%
Not knowing	7%	9%	3%

※Affected areas : Aomori, Iwate, Miyagi, Fukushima, Ibaraki, Tochigi, Chiba

Recent reports ICT-policies (in Swedish)

Working paper / PM 2011:07

Uppdatering av IT-politik
- Japan, Sydkorea, Indien, Kina och USA

Tillväxtnalys har fått i uppdrag av Regeringskansliet att göra en mindre kartläggning av IT-politiken i Japan, Sydkorea, Indien och Kina. USA har även inkluderats i kartläggningen. Materialet kan ses som ett tillägg för vidare diskussion kring ämnet och förslag på förordningsområdet från berörda parter.

tillväxtnalys

Working paper / PM 2011:03

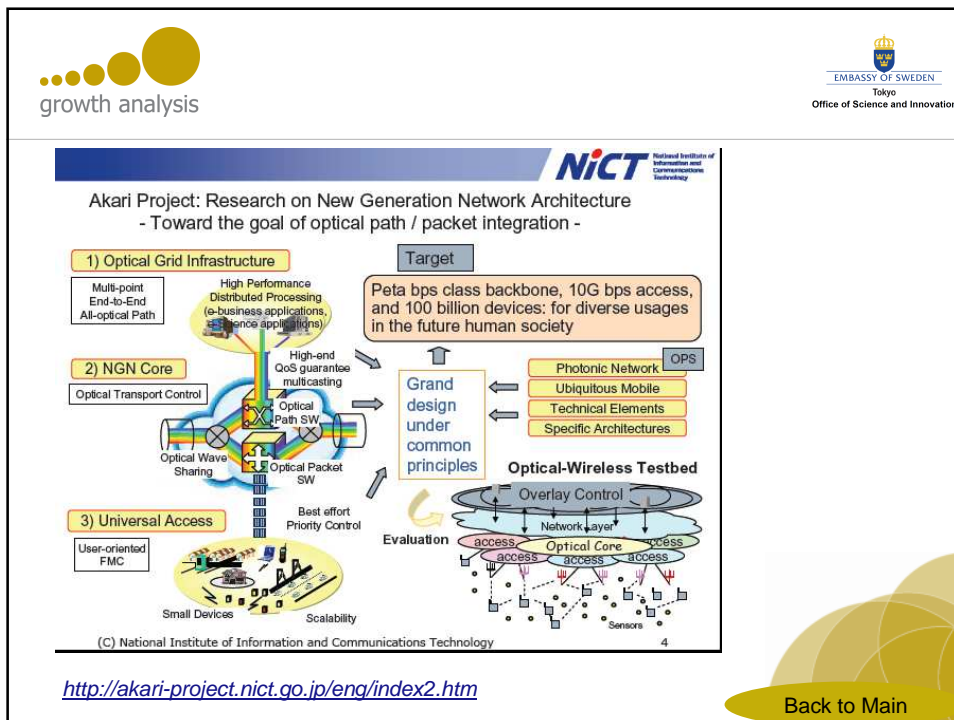

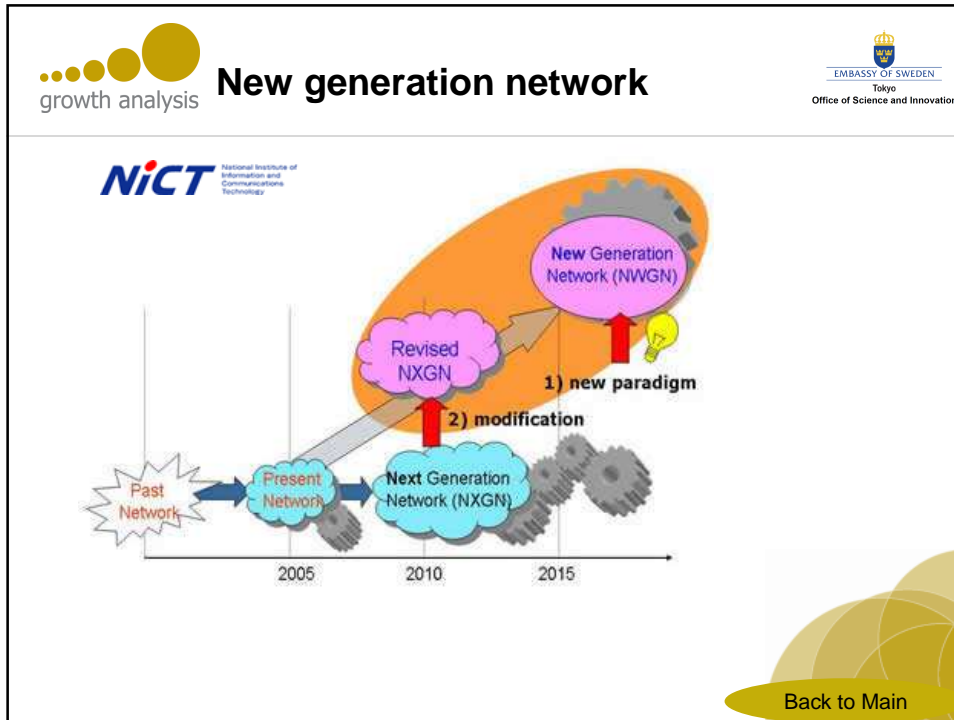

Digitala klyftor i ett globalt perspektiv - En översikt av syn och åtgärder från Japan, Sydkorea, Kina, Indien och USA

Tillväxtnalys bevakar på uppdrag av Näringsdepartementet politik och instanserutveckling för informationsvetenskap och digitala tekniker i Japan, Sydkorea, Kina, Indien och USA. I ser arbetet kommer utvärderingen av den digitala klyftan ofta upp. Denna överblickande rapport syftar till att ge en bild av hur olika länder ser på sina digitala klyftor och vilka åtgärder de gör för att överbrugga dessa.

4-5. Establishing International R&D Hubs

✓ Promoting international R&D hubs to accumulate human resources, funds, information and technologies from various stakeholders.

“Establishment of Advanced R&D Hubs”

Supplementary budget for FY2009: ¥10.1 B

Supplementary budget for FY2009: ¥1.2 B
➤ R&D for evaluation of batteries

Supplementary budget for FY2009: ¥7.7 B
Tsukuba Innovation Arena - nano
➤ Cooperation with national and international nanotech R&D and educational hubs

AIST Tsukuba

R&D hub for solar cells
Supplementary budget for FY2009: ¥0.6 B
➤ R&D for evaluation of solar cells

R&D hub for security of robotics
Supplementary budget for FY2009: ¥0.6 B
➤ R&D for safety standards of life-supporting robots

Satellite (outdoor exposure test field)

Ministry of Economy, Trade & Industry
Industrial competitiveness council, July 2010

Japanese industries are characterized by a large number of competing players

Overview of major players in each industry

	Japan	North America	Europe	Asia, etc.
LCD TV	Sony, Sharp, Toshiba, Panasonic, Funai	Vizio (USA)	Philips (Netherlands)	Samsung (South Korea), LGE (South Korea), TCL China
Railways	Nippon Sharyo, Hitachi, Kawasaki Heavy Industries, Tokyu Car, Kinki Sharyo	Bombardier (Canada)	ALSTOM (France) Siemens (Germany)	Hyundai Rotem (South Korea)
Nuclear power	Toshiba (WH), Hitachi, Mitsubishi Heavy Industries	GE(USA), [WH]	AREVA (France)	Doosan Heavy Industries & Construction (South Korea)
Water business (Drinking water / sewers)	Toray, Metawater, Ebara, Kubota, etc. *Major corporations include of 16 companies for equipment, nine for plant construction, and three for operations and maintenance	GE (USA), Nalco (USA)	Veolia (France) Siemens (Germany) Suez (France)	Thames Water (Australia)
Diagnostic imaging equipment	Toshiba Medical, Hitachi Medico, Shimadzu, Aloka	GE (USA)	Philips (France)	—

- Strategic R&D alliances with Japanese companies

The slide features a dark blue background with a starburst effect of light rays emanating from a bright point on the right. In the top left corner, there is a logo for 'growth analysis' consisting of four yellow circles of increasing size. To its right, the text 'EI-Seed is off to a bright future' is displayed. In the top right corner, the 'EMBASSY OF SWEDEN Tokyo Office of Science and Innovation' logo is present. Below the header, the text 'INVEST: SWEDEN' is written in white. A red rounded rectangle contains the words 'SUCCESS STORY' in white. The main body of the slide contains four paragraphs of white text.

growth analysis EI-Seed is off to a bright future

EMBASSY OF SWEDEN

INVEST: SWEDEN

SUCCESS STORY

EI-Seed is striving to develop a white LED technology that can replace normal lamp bulbs.

Optovent's technology for high-efficiency LED has been developed over a 15 year period at Linköping University.

Continued development is progressing smoothly both in Sweden and Japan:

EI-Seed is backed by the Japanese Government's technical development organization NEDO with 6,5 million USD. The market for white LEDs is estimated to 40 billion USD/year.
